PROFESSIONAL SUMMARY

Software developer with 4+ years of experience building Android apps and backend services for Italian companies in retail and enterprise software. I am the sole developer of a production Android app, which I migrated from Java to Kotlin and rebuilt in Jetpack Compose, and I work daily with .NET (C#) microservices, SQL databases and RabbitMQ messaging. Before that I worked on Java backends with Spring Boot, Hibernate, PostgreSQL and MySQL. In my own time I build personal apps for iPhone and macOS. I am used to owning a feature end to end, from the device to the backend services.

TECHNICAL SKILLS

Languages	Kotlin, Java, C# / .NET 8, SQL, TypeScript, JavaScript, HTML/CSS, Swift (basic)
Mobile	Android SDK, Jetpack Compose, MVVM, Kotlin Coroutines and Flow, Room, GreenDAO, device and peripheral integration, React Native and Expo (personal project)
Backend	REST APIs, microservices, Spring Boot, Hibernate, Entity Framework Core, Blazor, .NET Razor Pages, DevExpress, Supabase
Data & messaging	SQLite, SQL Server, PostgreSQL, MySQL, EF Core, RabbitMQ (exchanges, queues, routing keys)
Practices & tools	Git, GitHub Actions, Azure DevOps and Azure Pipelines, Docker, Postman, Maven, unit and UI testing, code review, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Development Specialist · Retail software company — Padova, Italy — Jun 2024 – Present

- Sole developer of a production Android app for retail chains, working directly with the product manager and fully responsible for delivery.
- Migrated the app from Java to Kotlin, rebuilding the entire UI in Jetpack Compose with an MVVM architecture.
- Planned and delivered the local database migration from GreenDAO to Room, including SQLite schema migrations on devices already in the field.
- Build and maintain .NET (C#) microservices and REST APIs supporting the handheld app and admin tools.
- Integrated RabbitMQ for communication between handheld devices, in-store applications and back-office services.
- Integrated Epson and Custom peripherals — barcode scanning and receipt printing — with industrial Android devices.
- Built a Blazor web app with DevExpress, in production, for multi-store performance analysis; production support including crash and ANR analysis, with releases via Azure Pipelines and Docker.

Software Developer · E-invoicing software company — Padova, Italy Mar 2023 – Apr 2024

- Backend development on an e-invoicing platform built as Java microservices with ERP integration, using Spring Boot, Hibernate, PostgreSQL and MySQL.
- Migrated the build system from Ant to Maven and upgraded the platform from Java 8 to Java 17.
- Built the integration with legal archiving software for digital preservation compliance.
- Wrote unit and UI tests, fixed critical production bugs, improved the client onboarding flow and took part in code reviews, technical documentation and CI/CD pipelines in an Agile team.

Intern Developer · Banking software company — Milan, Italy Sep 2022 – Jan 2023

- Built a Spring Boot and Hibernate application for a banking system, covering user data management, credit limit calculation and secure authentication and access configuration.

Intern · E-invoicing software company — Padova, Italy Feb 2022 – Jul 2022

- Improved test automation for e-invoicing software as my master's thesis project: moved test execution from local to remote browsers, increasing efficiency by 25%. Contributed to documentation and cross-team QA.

PERSONAL PROJECTS

- **PaceTasks** (in development) — github.com/bilgaaaaa/pacetasks. iPhone app that helps people with a fixed work schedule plan personal tasks around their working day. TypeScript, React Native and Expo, with a Supabase backend (Postgres with row-level security, Auth, Edge Function). Jest, pgTAP and Playwright tests run with GitHub Actions on every pull request.
- **Deskfocus** (macOS) — github.com/bilgaaaaa/deskfocus. macOS menu bar app and desktop widget that brings today's tasks (iCloud, Google Calendar, Google Tasks) together with a per-task focus timer. Built with Xcode, WidgetKit and App Intents.

EDUCATION

MSc in ICT for Internet and Multimedia · University of Padova — Padova, Italy Aug 2020 – Dec 2022

BSc in Electrical & Electronics Engineering · University of Turkish Aeronautical Association — Ankara, Turkey Aug 2014 – Jun 2018

LANGUAGES

Turkish: native · English: professional working proficiency · Italian: B1–B2, used daily at work.
